

# CERTIFICATE IN LEADING ONLINE COLLABORATION

- *The global Scandinavian leadership program*

## Learn to lead across borders, time zones and cultural differences

The **LEADING ONLINE COLLABORATION (LOC)** is a course which will increase your ability to lead, work and network online. The program will improve your skills to lead teams of people meeting online from all over the world.

Because the world of business is becoming more global and increasingly complex, organizations and managers must rely even more on online tools to lead and work together in global teams. This is why the LOC program takes place exclusively online. By using new online open source software, we not only train your ability to lead online collaboration, but also familiarize you with state-of-the-art tools that you can apply in your own organization.

With the increased international focus on "The Scandinavian Model" we believe that the Scandinavian approach to leadership supporting collaboration, trust, inclusion and equality can be an inspiration and increasingly relevant for business leaders to achieve results in a globalized world characterized by complexity and increased speed and rates of change.

During a 7-week period you will learn and discuss online with other leaders from around the globe. During the online sessions, you will also interact with guest experts and speakers who will share their learnings and experiences. All sessions will be led and moderated by Lars Hoffmann, Online Learning Expert from IME.
